Archived telemetry
Antarex (5 s) / Westermo systems 1-3 (30 s)
Causal preparation
Past-only alignment and rates; preserve gaps
70% / 15% / 15% chronological split
Training-only feature selection and scaling
Forecast models
Persistence; linear trend
Restricted ARIMA; LSTM
History: 60 observations
Horizon: 60 s / 300 s
Observed growth
Last 12 memory readings
Slope in pp/min
Warning rules
Trend only or
ARIMA / LSTM + trend
Validation thresholds;
3 consecutive readings
Forecast evaluation
Future actuals vs. forecasts
MAE / RMSE (pp of RAM)
All four recordings
Warning evaluation
Antarex labels only
Point / event measures
Local dashboard: archived replay and saved-model inference
